REQUEST FOR CERTIFICATE OF CORRECTION PURSUANT TO 37 C.F.R. 1.323

Dear Sirs:

Patentees respectfully request a certificate of correction to be issued for the above-identified U.S. Patent correcting the patent as noted in the attached "Certificate of Correction" Form PTO/SB/44.

The errors sought to be corrected are inadvertent clerical errors, which occurred during the translation of the above-identified application and do not impact the disclosure in any way. For example, Patentees request the symbol "Ag" found in column 3, line 32 and column 28, line 50, of the above issued U.S. Patent to correctly read --Mg--. This correction is consistent with and finds support in the disclosure of the application as originally filed. First, the error occurred through mistranslation. Yet, the application

07/28/2004 SSANDAR1 00000002 6749967

01 FC:1811

100,00 OP

incorporates by reference the Japanese priority applications P2000-128999 and P2000-129000, dated April 25, 2000. Certified copies of the Japanese priority applications were filed in the above-identified application on April 25, 2001. Therefore, the disclosure correctly identifies this element (i.e. Mg), except in the translation of the application at page 6, line 7 and page 63, line 9. Second, support is also found in the abstract of the application, which was correctly translated and discloses "A is a metal element selected from among Ti, Zn, Mg and Co or plural metal elements selected from among Ti, Fe, Zn, Mg and Co."

Therefore, correction does not involve such changes in the patent as would constitute new matter or would require reexamination.

Patentees respectfully request the grant of this Certificate of Correction.

Applicants submit credit card payment form PTO-2038 in the amount of \$120.00 to cover the required fee, pursuant to \$1.20(a). The Commissioner is hereby authorized to charge any fees associated with this communication or credit any overpayment to Deposit Account No. 19-3140.

Respectfully submitted,

Dated: July 21, 2004
